

MEGAMENGER

LEVEL-2 MENGER SPONGE: Build instructions

Building the level-2 Menger sponge floor by floor might not appeal to you. Fortunately, just as in the case with the level-1 sponge, we can use tripods made of level-1 sponges to construct them. To do this we will need the following:

Single level-1 tripods x 4

Level-1 x 4

These elements can link together to form a level-2 Menger sponge.

As in the case of the level-1 sponge, there is more than one order in which to put these building units together. This time we are going to leave you to figure it out yourself, but REMEMBER: try to put as many of the tabs in as possible. If you get about 90% you should be fine. If you're worried it's not stable, then feel free to use some tape!
